Product Overview

Marine-Grade Swing Check Valve

This JIS standard marine bronze swing check valve is engineered for demanding maritime environments requiring reliable backflow prevention. Constructed entirely from durable BC6 bronze, it provides excellent corrosion resistance and longevity in saltwater applications. The swing check design facilitates low pressure drop and efficient flow, ensuring optimal performance in marine piping systems.

Material Composition

Body Material	BC6 Bronze
Bonnet Material	BC6 Bronze
Disc Material	BC6 Bronze

Technical Standards

Compliance Standards	JIS Marine Standard, Marine Grade
Valve Type	Swing Check Valve
