

# Marine Deck Fittings for Boats

Marine deck fittings ensure secure and reliable performance in demanding marine environments. These fittings are essential components for safe and efficient docking and mooring operations, providing robust connection points for ropes and cables.

## ADDITIONAL IMAGES

## Product Overview

### Marine Deck Fittings

This range of marine deck fittings is engineered for robust and reliable performance in demanding maritime environments. Designed to facilitate safe and efficient mooring and anchoring operations, these components provide secure connection points for ropes, cables, and anchor chains. Constructed from high-quality materials, they are built to withstand harsh weather conditions, heavy loads, and corrosive marine exposure.

## Product Range

### Available Components

- Chain Stopper
- Smit Bracket
- Chock
- Fairlead
- Roller
- Double Bollard
- Cross Bitt
- 4 Rollers Fairlead
- 5 Rollers Fairlead
- Anchor Fairlead
- Horizontal Lead Sheave
- Vertical Lead Sheave
- Mooring Bollard

## Performance Metrics

Safe Working Load (SWL)

**540 kN**

Max Load Capacity

## Compliance & Standards

Certification & Standards

ISO Standards, Marine Grade, Corrosion Resistant
