

Marine Diesel Engine Component

This is a component for marine diesel engines. It is suitable for the UEC52LA model.

Product Overview

UEC52LA Engine Components

This collection features a comprehensive range of spare parts suitable for the UEC52LA marine diesel engine. The inventory includes critical engine components such as cylinder liners, pistons, fuel injection systems, and valve assemblies, available in new, used, or reconditioned states. These components are engineered to meet the high-stress and high-temperature operating requirements of heavy-duty marine propulsion systems.

Engine Components

Inventory List

Component Name	Part Number	Quantity Available
Cylinder Liner	134001	6
Piston and Piston Rod Complete	245000	7
Fuel Injection Pump Complete	310000	6
Cylinder Cover	141001	7
Exhaust Valve Complete	143000	7
Fuel Valve Complete	142000	12
Starting Air Valve Complete	144000	6
Indicator Valve Complete	146000	6
Cylinder Safety Valve Complete	144000	6

Turning Wheel Specifications

Motor Power	2.2 kW
Maximum Torque	1750 kgm
Driven Speed	17 rpm

Auxiliary Blower Specifications

Motor Power	30 kW
Voltage	440V 60Hz

Additional Components

Consumables	O-rings, Gaskets, Adjusting Screws, Nuts
