

Marine Diesel Engine with Gearbox

This marine diesel engine features increased water filters for cleaner fuel, protecting the injector and high-pressure pump. It extends working life through special piston ring and valve sealing techniques, greatly reducing consumption.

Product Overview

TOP ENGINE MANUFACTURER
SINCE 1987

Professional marine diesel engine equipped with gearbox for reliable power transmission.

PACKING

Secure industrial packaging with moisture control for safe international shipping.

High-Performance Marine Diesel Engines

These robust marine diesel engines are engineered for demanding maritime environments, offering exceptional reliability and power density. Designed with a compact architecture, they facilitate easier installation and transport while delivering leading mean effective pressure and power indicators. Advanced sealing techniques and high-frequency hardened components ensure superior wear resistance, providing an overhaul service life exceeding 10,000 hours.

Technical Specifications

Engine Performance Models

Model	Type	Displacement (L)	Bore/Stroke (mm)	Net Weight (kg)
ZH495C	L 4 / NA	3.26	95*115	330
ZH4100C	L 4 / NA	3.61	100*115	330
ZH495ZC	L 4 / TC	3.26	95*115	340
ZH4100ZC	L 4 / TC	3.61	100*115	340

Key Features

Durability Metrics

10000 hours

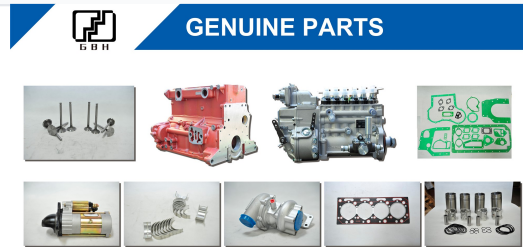

Overhaul Interval

Certifications & Standards

Certifications

ISO 9001, CE, CCS Certified

Maintenance

Comprehensive set of genuine components for maintenance and engine longevity.

Available Replacement Parts

- Cylinder heads and blocks
- Fuel injection pumps
- Turbochargers
- Starter motors
- Piston and liner kits
- Gasket sets
