

## Marine Diesel Generator (250kVA)

This marine diesel generator provides 250kVA of power for shipboard applications. It is cooled by a heat exchanger and features a brushless type marine alternator.

### ADDITIONAL IMAGES

### Product Overview

#### High-Performance Marine Power Generation

This 250kVA marine diesel generator is engineered for reliable shipboard power, featuring a heat exchanger cooling system and a brushless alternator. Certified by CCS and BV, it meets stringent international maritime standards for safety and performance. Designed for durability in harsh marine environments, it serves as a dependable primary or auxiliary power source for various vessel types.

## Technical Performance

### Core Performance Metrics

**250 kVA**

Rated Power

**317 kW**

Engine Output

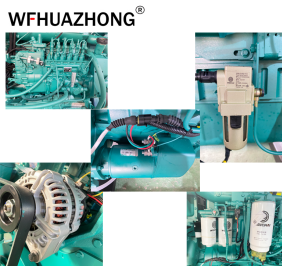

**1500 RPM**

Rated Speed

## Electrical Specifications

Rated Voltage	400V / 230V
Rated Current	450 A
Frequency	50 Hz
Phase	Three Phase

## Engine & Alternator

Engine Model	WP12CD317E200
Cooling Method	Heat Exchanger
Fuel Consumption	197 g/kWh
Alternator Type	Brushless / Marathon Type

## Compliance & Quality

Certifications	CCS, BV, CE, ISO 9001, ISO 14001
----------------	----------------------------------

## Physical Attributes

### WFHUAZHONG® PACKING

Net Weight

1800 kg

Color

Customized

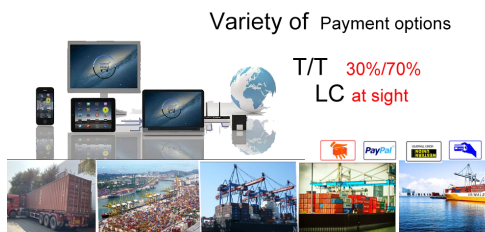

## Customization & Options

### Optional Configurations

- 60Hz Frequency
- Single Phase Output
- 110V/220V Voltage
- Customized Control Systems

## Logistics & Warranty

### WFHUAZHONG® PAYMENT AND DELIVERY

Warranty

3 months - 1 year

Payment Options

T/T (30/70), L/C at sight, PayPal, Western Union
