

# Marine Diesel Generator Set

This marine diesel generator set is engineered to deliver reliable power for marine applications. The generator features a durable diesel engine and advanced control systems for optimal performance and safety.

## ADDITIONAL IMAGES

## Overview

### Marine Power Solution

This marine diesel generator set is engineered to provide reliable and consistent power for various maritime applications. Delivering a prime power output of 90KW/113KVA at 50Hz, it is built to withstand demanding marine environments. The system includes essential components for immediate operation, offering a comprehensive power generation solution.

## Performance Metrics

### Prime Power Output

<b>90 kW</b> Prime Power (KW)	<b>113 kVA</b> Prime Power (KVA)
----------------------------------	-------------------------------------

Frequency

50 Hz

## Technical Specifications

Engine Type	Marine Diesel Engine
Alternator Type	Marine Alternator

## Included Components

### Included Equipment

- Vibration Absorber
- Dry type air filter
- Oil filter
- Standard control panel
- Lead acid batteries
- Battery rack and cable
- Ripple flex exhaust pipe
- Exhaust siphon
- Industrial muffler
- User manual
