

Marine Diesel Generator Set

Marine diesel generator sets deliver reliable and efficient power for marine applications. Featuring robust diesel engines and high-performance alternators, these sets provide stable power for onboard electrical systems.

Overview

Reliable Marine Power Solutions

The WD615/618 series marine generating sets provide a robust power solution designed for demanding maritime environments. Capable of operating at both 1500 and 1800 rpm, these units deliver versatile power output tailored for diverse vessel requirements. These systems are suitable for both common and emergency power applications, prioritizing operational safety and consistent performance through advanced monitoring and parallel functionality.

Technical Specifications

Power Output Range

64 kW

Minimum Power

200 kW

Maximum Power

Operating Speeds

- 1500
- 1800

Alternator Insulation

F-Grade • H-Grade

Compliance and Standards

Certifications	CSS, ZY, BV
Manufacturing Standard	GB/T13032-1991

Operational Features

Alarm & Protection

- Over-limit speed alarm
- Oil pressure monitoring
- Cool-water temperature monitoring

Parallel Operation	Yes
