

Marine Diesel Generator Set

The marine diesel generator set is engineered for dependable power generation in marine environments. Its robust diesel engine and efficient generator deliver a consistent power supply for onboard electrical systems.

Overview

Marine Power Solutions

The 226B series marine generating sets are engineered for reliable power generation in demanding maritime environments. Utilizing advanced diesel technology, these units offer a power output range of 24-120kW to support various onboard electrical systems. The sets are built to strict quality standards and feature capabilities for parallel operation and seamless load transfer, ensuring consistent performance for professional marine vessels.

Performance Specifications

Power Output Range

24 kW

Minimum Power

120 kW

Maximum Power

Certification Standards

CSS, ZY, BV, GB/T13032-1991

Technical Details

Compatible Generator Brands

- Marathon
- Stanford
- Lanzhou

Insulation Class Options

F Grade • H Grade

Operational Capabilities

Parallel Connection Support

Yes

Seamless Load Transfer

Available during normal operation without stopping
