

# Marine Diesel Generator Set

Marine diesel generator sets provide reliable power generation for marine applications. These generator sets feature durable diesel engines and high-performance alternators for a stable and consistent power supply.

## Overview

### Reliable Marine Power Generation

The 170Z Series Marine Generating Sets are engineered to provide consistent and robust power for a variety of maritime applications, including cargo ships, tankers, and offshore platforms. These units utilize high-performance diesel engines paired with professional-grade alternators to ensure operational stability in harsh marine environments. Designed with ease of maintenance in mind, the series supports parallel operation and advanced safety monitoring to minimize downtime and operational costs.

## Technical Specifications

### Power Output Range

**250 kW**

Minimum Power

**400 kW**

Maximum Power

### Rotating Speeds

- 1000
- 1500

### Insulation Grade

F

## Compliance and Safety

### Protection & Alarming

- Speed limit alarm
- Oil pressure alarm
- Coolant temperature alarm
- Oil temperature alarm

### Manufacturing Standards

GB/T13032-1991, CSS, ZY

## Operational Features

### Parallel Operation

Yes
