

Marine Diesel Generator Set, 50Hz

This marine diesel generator set operates at 50Hz, providing a reliable electrical power source for marine applications. The unit is engineered for durability in harsh marine environments, featuring a heavy-duty diesel engine and a high-efficiency alternator for stable power output.

Overview

Marine Diesel Generator Set

This marine diesel generator set is engineered for reliable power generation in demanding maritime environments. It combines a heavy-duty diesel engine with a high-efficiency alternator to ensure consistent electrical output for critical onboard systems. Designed for longevity, the unit features corrosion-resistant construction and advanced control systems for optimal safety and performance.

Technical Specifications

Frequency	50 Hz
Power Source	Diesel

Performance & Compliance

Compliance	Marine Industry Standards Compliant
Performance Features	High-Efficiency Alternator, Heavy-Duty Engine, Stable Power Output

Construction

Build Quality

- Corrosion-resistant materials
- Rugged construction
- Advanced monitoring systems
