

Marine Diesel Generator Set

This marine generator set is engineered for reliable power generation in demanding maritime environments. It features a robust diesel engine coupled with a high-efficiency alternator, providing a stable and consistent power supply.

Overview

Reliable Marine Power Generation

This marine diesel generator set is engineered for consistent performance in demanding maritime environments, featuring a compact and robust design. Built to withstand high humidity and temperature conditions, the unit ensures stable, continuous power output for critical operations. It incorporates comprehensive safety protections and an integrated fuel system, designed for ease of maintenance and long-term durability at sea.

Performance & Quality

Integrated Safety Protections

- Low oil pressure protection
- High coolant temperature protection
- Overcurrent protection
- Overload protection

Load Testing Compliance

25% Load, 50% Load, 75% Load, 100% Load, 110% Load

Construction & Durability

Integrated Fuel Tank Runtime

8 Hours

Runtime

Corrosion Protection

Sandblasted • Powder Coated • 3-Year Anti-Rust

Operational Features

Environmental Adaptation

High humidity and high temperature marine environments

Maintenance & Operation

Designed for simple, intuitive operation and convenient routine maintenance.
