

Marine Engine 138kW-190kW

Marine engine provides power in the range of 138kW to 190kW. It is engineered for reliable performance and durability in marine environments.

Overview

High-Performance Marine Propulsion

This series of marine engines is engineered to deliver reliable power ranging from 138kW to 190kW. Designed for durability in demanding maritime environments, these units feature advanced turbocharging and intercooling technology to optimize performance. Each unit is delivered in a secure wooden case, ensuring suitability for international freight and transport requirements.

Technical Specifications

Engine Variants & Ratings

Model	Power (kW)	Configuration
6CTA8.3-M188	138-152	Turbocharged & Intercooled
6CTA8.3-M205	151-166	Turbocharged & Intercooled
6CTA8.3-M220	164-180	Turbocharged & Intercooled

Power Output Range

138 kW

Minimum Power

190 kW

Maximum Power
