

Marine Engine Piston Ring Set

This ring set is designed for marine engine applications. It provides optimal performance and durability.

Product Overview

High-Performance Marine Piston Ring Set

This premium marine engine piston ring set is engineered to deliver optimal engine performance and long-term durability in demanding marine environments. Designed to exact standards, the set ensures a precise fit to maintain engine compression and efficiency. Each package contains a complete ring set for single-piston application, ensuring high reliability for marine machinery maintenance.

Technical Details

Part Number	12661-22500
Packaging Quantity	1 PC
Country of Origin	Japan

Compliance & Quality

Quality Certifications	Genuine Parts, Marine Grade
