Product Overview

Marine-Grade Rope Guidance

This marine fairlead is engineered to provide smooth rope guidance, effectively reducing friction and preventing wear on lines during mooring or anchoring operations. Constructed with a polished finish, it offers superior corrosion resistance suitable for harsh marine environments. The robust design includes integrated rollers or guides to ensure efficient line handling, making it an essential component for secure deck operations.

Category

Rigging Hardware

Technical Specifications

Key Features

- Low-profile design
- Corrosion-resistant finish
- Integrated roller guides
- Secure mounting base

Applications

Marine • Mooring • Anchoring • Rigging

Material

Stainless Steel, Carbon Steel

Manufacturing Method

Casting and Forged
