

Marine Fan Coil Unit

This fan coil unit is designed for marine and yacht applications, providing efficient cooling and heating. Its durable construction is suitable for marine environments, ensuring reliable performance onboard.

Overview

Marine Climate Control Solution

This Marine Fan Coil Unit is engineered specifically for maritime environments, ensuring reliable climate control for onboard comfort. Designed for versatility, it operates efficiently across a wide temperature range and provides consistent airflow for cabins and interior spaces. Its durable construction meets the demanding requirements of yacht and ship applications.

Performance Metrics

Air Flow Capacity

1000 m³/h
Air Flow

Flow Pressure

1000 Pa

Technical Specifications

Operating Temperature Range

-10 to 50 °C

Application

Primary Application

Ships, Yachts, Marine Environments
