Product Overview

Reliable Marine Power Solution

The MG-06 Gearbox Set is engineered for stable and reliable power transmission in demanding environments. This robust assembly integrates a single-cylinder diesel engine with a high-performance 06 gearbox, making it a versatile choice for marine propulsion and construction machinery applications. Designed for durability, the unit features a corrosion-resistant housing and a sturdy base frame for easy installation.

Technical Specifications

Gearbox Model	MG-06
Engine Type	Single Cylinder Diesel
Primary Applications	Marine Propulsion, Propellers, Construction Machinery

Construction & Design

Construction Materials

- Cast Iron
- Steel Components
- Corrosion-resistant housing

Key Features

Starter Motor Included • Integrated Fuel Tank • Heavy-duty Design • Base Frame Mounted
