

# Marine Hydraulic Motor

This hydraulic motor is designed for marine applications such as steering gear and winches. It features a robust construction and multiple connection ports for hydraulic lines.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Marine Hydraulic Motor

This professional-grade hydraulic motor is engineered for demanding maritime environments, providing reliable power for shipboard systems. Its robust construction ensures long-term durability and high torque output, making it an ideal choice for critical applications such as steering gear, winches, and propulsion systems. Designed with maintenance in mind, the unit features accessible internal components and a reinforced body to withstand harsh operational conditions.

## Technical Specifications

Model Type	MH4000F Type-1
Production Date	2021-03-26
Serial Number	21118230 RA-15

## Key Features

### Performance Metrics
