

Marine Machinery Screw Bolt

High-strength screw bolts designed for marine machinery applications. These studs are suitable for demanding environments.

Product Overview

Industrial Marine Fasteners

These high-strength screw bolts are specifically engineered for demanding marine machinery applications. Designed for reliability in harsh environments, each unit is precisely assembled to ensure optimal structural integrity. This supply package includes two units per bag, providing essential replacement components for critical engine and machinery repairs.

Technical Specifications

Component Type	Stud
Model Compatibility	MAK 8M453C
Part Reference	1.2107-025
Internal Code	1367166

Packaging and Logistics

Units per Bag	2
Total Bags Included	2
Packaging Status	Assembled in Packing
