

Marine Power Generator Set

This marine generator set provides reliable power in harsh marine environments. It features a durable engine and high-efficiency alternator for consistent electrical output.

Overview

Marine Power Generator Set

This marine series generator set is designed for reliable power generation in marine environments. It features a robust engine coupled with a high-efficiency alternator, providing stable and consistent electrical output. The system includes advanced control and monitoring capabilities, ensuring optimal performance and safety, while key components are protected against corrosion and harsh marine conditions.

Design & Construction

Build Features

Corrosion Resistant, Vibration Isolation, Sturdy Base Frame

Applications

Suitable Applications

- Primary power
- Emergency power
- Auxiliary power
