

Marine Pump Spare Parts Kit

This kit provides essential components for maintaining ship pumping systems. It includes filters, gears, bearings, and other parts needed for servicing marine pumps.

Product Overview

Comprehensive Marine Maintenance Kit

This Marine Pump Spare Parts Kit is designed for the efficient maintenance and repair of pumping systems in maritime applications and peripheral equipment. The set includes a diverse range of critical components, such as cylindrical and spherical filter elements, gears, and bearings, ensuring comprehensive coverage for standard system servicing. Every component is individually packaged and labeled to facilitate quick identification and organized inventory management during maintenance tasks.

Technical Specifications

Components Included

- Cylindrical filter elements
- Spherical wound filter elements
- Gears
- Bearings
- Miscellaneous fastening components

Compatibility

Ship pumping systems, Peripheral equipment, Marine maintenance

Packaging and Logistics

Packaging Type

Individual clear plastic bags with identification labels

Ready for Installation

Yes
