

# Marine Sanitary Module - Prefabricated Washroom Unit

The marine sanitary unit is designed for installation on various vessels, including bulk carriers, containers, and oil tankers. These prefabricated modules are constructed in accordance with ISO and IMO standards, as well as the requirements of various Classification Societies.

## Overview

### Professional Marine Sanitary Solutions

This prefabricated marine sanitary module is engineered for efficiency and durability in maritime environments, including bulk carriers, container ships, and oil tankers. Designed to meet rigorous ISO and IMO standards, the unit ensures compliance with major classification societies worldwide. Its compact footprint maximizes space without compromising on essential hygiene functionality.

## Dimensions

### Height Options

- 2100
- 2200

### Length

2100 mm

### Width

1600 mm

## Materials & Construction

### Floor Material Options

Ceramic Tile, Quartz Sand, Glass Fiber, PVC, Mosaic

## Compliance & Certification

### Classification Societies

ABS • DNV • CCS • NKK • LR • GL • BV • RINA

### Standards Compliance

ISO Standard, IMO Standard
