

# Marine Seven Roller Fairlead for Rope Guidance

This roller fairlead is designed for marine applications. It features seven rollers that guide ropes and cables, reducing friction and preventing damage.

## Product Overview

### Heavy-Duty Marine Guidance

The Marine Seven Roller Fairlead is a robust solution engineered for demanding marine mooring applications. Featuring seven precision-engineered rollers, it ensures smooth and efficient guidance for ropes and cables, significantly reducing wear and tear. Built to withstand harsh maritime environments, this fairlead offers exceptional durability and corrosion resistance, providing reliable performance across various vessel sizes and mooring configurations.

## Standards & Compliance

### Certifications

ABS • GL • LR • BV • CCS • DNV • KR

### Design Standards

JIS Type, ISO Type, DIN Type

## Logistics

### Delivery Lead Time

15 days

### Packaging

Pallets, niking

## Key Features

### Key Benefits

- Minimizes friction for rope longevity
- Corrosion-resistant construction
- Suitable for diverse vessel sizes
- Smooth cable guidance

### Roller Configuration

7 rollers
