

Marine Turbocharger for Diesel Engines

This turbocharger is designed for marine applications. It increases engine power by forcing more air into the combustion chamber, improving fuel efficiency and reducing emissions.

Product Overview

Marine Turbocharger Systems

This series of high-performance marine turbochargers is designed for large-scale diesel engines in maritime vessels. By forcing additional air into the combustion chamber, these units significantly increase engine power output while optimizing fuel efficiency and reducing emissions. Engineered for durability, these robust systems are built to withstand the demanding conditions of harsh marine environments.

Inventory Availability

In-Stock Turbocharger Models

Model	Condition	Quantity
VTR714-32	Used	1
VTR564-11	Used	3
VTR500	Refurbished	2
VTR250	New/Used	2
VTR250	Refurbished	2
VTR200	New	1
VTR160	Refurbished	10

Available Conditions

New, Used, Refurbished
