

Marine/Industrial Access Hatch

This hatch cover is designed for marine and industrial access points. It features robust construction and secure locking mechanisms.

Product Overview

Professional Grade Access Hatch

This robust access hatch is engineered for demanding marine and industrial environments. It features a heavy-duty construction with an integrated raised coaming to effectively prevent water ingress in exposed conditions. Designed for secure operation, the unit incorporates reliable locking mechanisms to ensure a watertight seal and operational safety across various shipboard or industrial access points.

Technical Specifications

Key Design Features

- Raised coaming for water ingress prevention
- Secure locking mechanism
- Heavy-duty industrial construction
- Watertight sealing capability

Model	DPS 450
Suitable Applications	Marine, Industrial, Shipboard Access, Boat Decking
