Product Overview

Versatile Feed Processing Solution

This advanced processing unit is engineered for efficient agricultural feed production, handling both mash powder preparation and pelletizing. By integrating crushing, mixing, and flat die pelletizing functions into a single system, it ensures consistent nutritional output for various animal feed requirements. Its robust construction and reliable performance make it an ideal choice for small-to-medium scale agricultural operations seeking durable machinery.

Technical Specifications

Capacity

1 TPH

Minimum Capacity

2 TPH

Maximum Capacity

Available Models

- HXFW-1000
- HXFW-2000

Equipment Type

Mixing Equipment, Feed Hammer Mill, Flat Die Pelletizer

Compliance & Logistics

Certifications

ISO9001 • CE

HS Code

84361000

Origin

China
