

Masonry Cutting Saw

The masonry saw is a power tool used for cutting materials such as tile, stone, brick, and concrete. It utilizes a high-speed circular blade, often diamond-tipped, and a water cooling system to ensure precise and efficient cutting.

Product Overview

Professional Masonry Cutting Solution

The Masonry Cutting Saw is a specialized power tool engineered for precision cutting in hard materials like tile, stone, brick, and concrete. Featuring a high-speed diamond-tipped blade system, it ensures efficient and clean cuts for construction, renovation, and landscaping projects. The design incorporates safety features such as blade guards and a stable base, alongside a cooling mechanism to maintain performance during continuous operation.

Technical Specifications

Model Number	KMS110S
Blade Diameter	110 mm
Max Cutting Capacity	30 mm

Performance Metrics

Performance Highlights

1250 W Power Input	14200 RPM No-Load Speed
------------------------------	-----------------------------------

Key Features

Safety & Stability

Blade Guard • Stable Base • Water Cooling System

Suitable Materials	Tile, Stone, Brick, Concrete, Marble
--------------------	--------------------------------------
