

Masonry Hammer with Forged Steel Head

This masonry hammer is designed for durability and precision in various construction tasks. It features a forged steel head for splitting and shaping materials, along with an ergonomic handle for optimal balance and control.

Product Overview

Built for Precision and Durability

This masonry hammer is engineered to meet the demanding requirements of professional stone setting, bricklaying, and concrete work. It features a robust forged steel head designed for exceptional strength and longevity under heavy-duty use. The ergonomic handle is equipped with a non-slip grip, ensuring safety and comfort during extended operation while providing superior balance and control for splitting and shaping materials.

Technical Specifications

Suitable Applications

- Bricklaying
- Stone setting
- Concrete work
- Splitting materials
- Shaping materials

Material Composition

Forged Steel, Non-slip Material

Features

Key Benefits

Ergonomic Design • High Durability • Precision Shaping • Non-slip Grip
