

Masonry Saw for Brick Stone Tile

This masonry saw is a precise cutting tool designed for professional use in construction and tile work. It features a powerful electric motor driving a circular blade, optimized for cutting through dense materials.

Overview

Professional Masonry Cutting Solution

The BS355 masonry saw is a robust and precise cutting tool engineered for professional use in construction and tile work. It features a powerful electric motor optimized for cutting through dense materials like brick, stone, and tile. With an integrated water cooling system and adjustable cutting table, it ensures clean, accurate, and dust-reduced operation in demanding work environments.

Performance & Features

Key Features

- Powerful electric motor
- Integrated water cooling system
- Adjustable cutting table for miter cuts
- Sturdy frame for stability
- Integrated wheels for portability

Safety Standards

Blade Guard, Emergency Stop Switch

Applications

Suitable Materials

Brick • Stone • Tile
