

# Masonry Trowel with Wooden Handle

This masonry trowel features a pointed, flat steel blade designed for spreading and smoothing mortar or plaster. It includes a wooden handle riveted to a curved steel shank for comfortable grip and optimal leverage.

## Product Overview

### Professional Masonry Tool

This masonry trowel is engineered for efficiency and durability in professional construction environments. Featuring a high-quality flat steel blade, it is designed for precise spreading and smoothing of mortar or plaster. The ergonomic wooden handle provides a reliable grip, ensuring comfort and controlled leverage during demanding bricklaying or plastering tasks.

## Technical Specifications

### Key Features

- Pointed, flat steel blade
- Riveted wooden handle
- Curved steel shank for leverage

Blade Material	Steel
Handle Material	Wood
Primary Applications	Bricklaying, Plastering, Masonry
