Overview

Professional Cooling System Diagnostics

The Master Cooling System Pressure Tester Kit is a comprehensive diagnostic tool designed for professional automotive maintenance. This 27-piece set allows for precise pressure testing to identify leaks in radiator and cooling systems, while also facilitating vacuum purging and refilling to eliminate air pockets. Engineered for versatility, it includes a wide array of adapters compatible with most domestic and import vehicles, ensuring reliable performance in demanding workshop environments.

Technical Specifications

Gauge Pressure Range

35 psi

Max Pressure

2.5 bar

Max Pressure

Kit Contents

- Pressure testing pump with hose
- Quick coupler with pressure release
- Pressure gauge
- 17 Test caps for domestic and import vehicles
- 1 Blue radiator cap test adapter
- 1 Black radiator cap test adapter
- Vacuum type coolant tool
- Universal adapter
- Temperature gauge
- Blow molded storage case

Compatibility
