

Masticating Juicer for Fruits and Vegetables

This slow juicer efficiently extracts juice from fruits and vegetables. Its slow squeezing action preserves more nutrients and enzymes compared to traditional centrifugal juicers.

Product Overview

Efficient Slow Juicing Technology

This slow juicer utilizes advanced low-speed extraction to preserve essential nutrients and enzymes in your fruits and vegetables. Featuring a durable food-grade ceramic auger, it delivers an impressive 85% average juice yield. Designed for both professional and home use, its compact footprint saves valuable counter space while ensuring easy cleaning with dishwasher-safe components.

Technical Specifications

Voltage Compatibility

- 100-127V
- 220-240V

Power Output

150 W

Rotation Speed

75 RPM

Average Juice Yield

85 %

Material and Build

Auger Material

Food-grade ceramics

Appliance Weight

3.6 KGS

Logistics and Certification

Container Loading Capacity

Container Type	Quantity
20GP	424
40GP	878
40HQ	1030

Approvals

CE, GS, ROHS
