

Masticating Slow Juicer

This masticating juicer uses a low-speed extraction process to minimize heat and oxidation, preserving nutrients and enzymes. It efficiently juices various fruits, vegetables, and leafy greens with its durable auger and powerful motor.

Product Overview

Professional Masticating Slow Juicer

This masticating slow juicer utilizes a low-speed extraction process to minimize heat and oxidation, ensuring that nutrients and enzymes are preserved in every glass. Engineered with a durable auger and a powerful motor, it efficiently processes a wide variety of fruits, vegetables, and leafy greens. Its compact design and easy-to-clean components make it an ideal choice for high-performance, quiet, and reliable juicing operations.

Performance Features

Operation

Quiet Operation

Extraction Technology

Masticating (Low-Speed)

Key Benefits

Nutrient Preservation, Enzyme Retention, Low Oxidation

Components & Accessories

Included Components

- Feeding Chute
- Juice Container
- Pulp Container
- Cleaning Brush

Design

Design Highlights

- Compact footprint
- Easy-to-clean parts
- Durable auger construction
