

Material Mixing Electric Mixer

This electric mixer is a versatile tool for mixing paint, mortar, and plaster. It features adjustable speed settings and an ergonomic handle for comfortable operation.

Overview

Professional Material Mixing Solution

This electric mixer is engineered for high-performance mixing of various construction materials, including paint, mortar, and plaster. Featuring a robust gearbox and a high-torque motor, it ensures consistent results even with heavier mixtures. The design prioritizes user comfort with an ergonomic handle and includes safety features like a lock-on switch for extended operation.

Technical Specifications

Power Output

1050 W

Power

Electrical Requirements	220-240V~50/60Hz
No Load Speed	550 rpm
Max Mixture Volume	120 L
Max Paddle Diameter	120 mm
Tool Fitting	M14 X 2

Features & Safety

Key Features

- Variable speed control
- Safety on/off switch with lock-on button
- Ergonomically designed handle
- Robust gearbox
- Integrated LED light for low-light conditions

Safety Standards	Double insulation, Class II Protection
