

Material Thickness Grading Machine

This machine tool is designed for precise material thickness grading. Adjustable settings accommodate various material types and thickness requirements, making it suitable for applications requiring accurate and consistent sorting.

Overview

Professional Thickness Grading Solution

The HS600/800 Thickness Grader is an industrial-grade machine tool engineered for precision material thickness sorting. Featuring a robust construction, it ensures long-term reliability and consistency in demanding production environments. With adjustable settings to handle diverse material types, this machine provides an efficient solution for operations requiring exact thickness quality control.

Technical Specifications

Key Features

- Multi-compartment design
- Integrated control panels
- Robust industrial construction
- Adjustable grading settings

Model Designation	HS600/800
Primary Application	Material Thickness Grading, Thickness Sorting, Industrial Quality Control
