

Matrix Pattern Plastic Pallet

This plastic pallet features a matrix pattern design, enhancing load distribution and stability. It is suitable for warehouses, manufacturing, and logistics, offering resistance to moisture, chemicals, and impact.

Product Overview

Industrial Strength Performance

The Matrix Pattern Plastic Pallet offers a highly durable yet lightweight solution designed for demanding logistics and manufacturing environments. Engineered with a specialized matrix pattern, it ensures superior load distribution and stability during transport. Constructed from high-density polyethylene, this pallet is built to resist moisture, chemicals, and impact while remaining compatible with standard warehouse handling equipment.

Technical Specifications

Material	High-Density Polyethylene (HDPE)
Entry Type	4-way entry
Surface Design	Matrix Pattern, Non-slip Surface

Key Features

Resistance Ratings

Moisture Resistant • Chemical Resistant • Impact Resistant

Equipment Compatibility

- Forklift compatible
- Pallet jack compatible
