

Mattock Pick with Dual Head

The mattock pick is a versatile hand tool used for digging, prying, and chopping. It features a sturdy head with a flat blade on one end for digging and a pointed pick on the other for breaking up hard soil or rocks.

Product Overview

Versatile Dual-Head Design

The Mattock Pick is a robust, multi-purpose hand tool engineered for demanding landscaping and gardening tasks. It features a dual-head design with a flat blade on one end for efficient digging and a pointed pick on the other for breaking through hard soil or rocky terrain. Designed for leverage and control, this tool is an essential asset for excavation, prying, and ground preparation.
