

MC480 25t Capacity Tower Crane

This tower crane has a maximum load capacity of 25t and a maximum radius of 80m. Its tip load is 3.0t, with an independent height of 76.5m and a maximum possible height of 280m.

Product Overview

High-Performance Tower Crane

The MC480 is a robust tower crane engineered for demanding construction environments. With a maximum lifting capacity of 25 tons and an extensive working range of 80 meters, it provides the reach and power required for large-scale infrastructure and building projects. Its design emphasizes stability and operational efficiency, making it a reliable asset for heavy material handling.
