

MCB Miniature Circuit Breaker Pan Assembly

This pan assembly is designed for mounting miniature circuit breakers. It is available in fire-resistant and non-fire resistant types, with 125A and 250A options, and sizes from 6W to 60W.

Overview

Professional Circuit Distribution

This Miniature Circuit Breaker (MCB) Pan Assembly is engineered for secure and efficient power distribution in industrial and commercial electrical systems. Designed to facilitate the mounting and connection of multiple MCBs, the assembly ensures optimal spacing and insulation to prevent electrical hazards. It supports rigorous safety standards and features robust construction for reliable performance in demanding transmission and distribution environments.

Technical Specifications

Rated Current Options	125A, 250A
Available Ways	6W to 60W

Compliance & Safety

Supported Standards

- DIN VDE 0100
- IEC 60204-1
- EN 60204-1
- VDE 0113-1
- IEC 60439

Certifications

DEKRA Certified

Design Features

Housing Color Coding

- Blue
- Green-Yellow
- Black

Construction Details

Feature	Benefit
Insulating Materials	Ensures safety and prevents short circuits
Metal Conductors	Robust performance for power transmission
Terminal Blocks	Clear labeling for circuit identification
