

Meat Shredding and Slicing Machine

This machine is designed for cutting chicken and shredding pork slices. It reduces preparation time and minimizes bacteria infection, which extends the product shelf life.

Product Overview

High-Efficiency Meat Processing

This advanced shredding and slicing machine is engineered to streamline meat processing tasks, particularly for chicken and pork. By providing consistent and uniform cuts, it significantly reduces preparation time and operational costs compared to manual methods. Its hygienic, stainless steel design promotes food safety by minimizing bacterial contamination and helping to extend the shelf life of processed products.

Technical Specifications

Construction Material	Stainless Steel
Key Features	High-torque motor, Adjustable slicing thickness, Large capacity hopper, Continuous feeding

Performance

Operations

Industrial Applications

- Food processing
- Meat preparation
- Industrial shredding

Operational Benefits

Time saving • Cost reduction • Bacterial reduction • Extended shelf life
