

Mechanical Doorbell with Geometric Design

This mechanical doorbell features a textured geometric design on its front panel. Its mechanical operation ensures reliable performance without the need for batteries or electrical connections.

Product Overview

Reliable Mechanical Chime

This mechanical ding-dong door chime features a modern geometric design, making it a stylish addition to any entryway. Engineered for consistent performance, it operates directly from main power without the need for frequent battery replacements. Its robust construction and clear 80dB sound output ensure reliable alerts for residential or commercial settings.
