

Mechanical Linkage Connector

This mechanical linkage connector is made from durable metal and coated in black. It features a central bar with rectangular blocks and hexagonal nuts.

Product Overview

Professional Mechanical Linkage Solution

This mechanical linkage connector is a robust assembly designed for high-performance industrial applications. Constructed from durable, high-strength metal with a protective black coating, it is engineered for reliability in demanding mechanical environments. The central bar design combined with dual rectangular mounting blocks ensures versatile integration into various linkage systems.

Technical Specifications

Finish

Black Protective Coating • Durable Metal

Design Components

- Central connecting bar
- Dual rectangular blocks
- Circular mounting apertures
- Hexagonal locking nut terminals

Industry Standards

Industrial Grade, Mechanical Assembly
