

Mechanical Linkage Rod with Ball Joints

This mechanical linkage rod is designed with ball joints on either end. The rod, made of steel, allows for articulation and movement in multiple directions.

Product Overview

Mechanical Linkage Rod with Ball Joints

This high-quality mechanical linkage rod is designed for reliable performance in automotive steering and suspension systems. Featuring precision-engineered ball joints on both ends, it ensures smooth articulation and efficient force transmission. Built for durability, this component is compatible with specific light commercial vehicle models, ensuring a precise fit and long-lasting operation.

Compatibility

Compatible Models

- ST30T
- ST40T
- ST30V
- ST40V
- ST30B

Vehicle Make

Suzuki

OEM Number

48900-79001

555 Reference Number

SD-7450

Vehicle Name

Carry
