

# Mechanical Music Box with Hand Crank

This mechanical music box features a rotating cylinder with pins. It is equipped with a hand crank, brass base plate, and a governor mechanism.

## Product Overview

### Precision Mechanical Engineering

This mechanical music box features a high-precision rotating cylinder with pins that pluck tuned teeth on a comb to produce harmonious musical notes. Designed for reliability and consistent performance, it incorporates a governor mechanism to regulate the rotational speed, ensuring a perfectly steady tempo during manual operation. Crafted with a stable brass base plate, this instrument combines classic mechanical design with durable, high-quality materials.

## Technical Specifications

Operation Method	Hand crank
Tempo Control	Yes
Base Plate Material	Brass

## Key Features

Core Features	Mechanical Governor, Hand-cranked, Brass Base Plate, Precision-aligned Comb
