

Mechanical Timer with Programmable Pins

This mechanical timer controls electrical cycles using settable pins. It features a rotating dial marked with minutes and a power indicator light.

Product Overview

Precision Mechanical Timing Control

This robust mechanical timer provides reliable, programmable control for your automated systems. Featuring an intuitive rotating dial design, users can easily manage timing cycles ranging from 2 to 60 minutes. Its settable pin system allows for precise on/off cycle configuration, while the integrated power indicator ensures clear operational status at a glance.

Operational Specifications

Timing Range	60 min
Minimum Time Increment	2 min
Control Mechanism	Mechanical Dial, Programmable Pins, Manual Set Button

Features

Operational Indicators

- Power Indicator Light
- Tactile Set Button
- Visual Minute Markings
