Product Overview

Professional Medical Refrigeration

This 120-liter medical refrigerator is engineered for the precise storage of temperature-sensitive pharmaceuticals, vaccines, and biological samples. It features an advanced digital thermostat system to ensure optimal internal climate control and stability. Designed for reliability in pharmacies, hospitals, and laboratories, the unit provides both glass door options for easy inventory visibility and foam door options for enhanced thermal insulation and privacy.

Technical Specifications

Volume	120 L
Cooling Technology	Forced-air cooling
Control Interface	Digital thermostat with temperature display
Available Door Configurations	Glass Door, Foam Door
