

Medical Storage Freezer

This upright medical freezer maintains a stable internal environment for storing sensitive materials. It features a glass door for content visibility, adjustable shelves, and a forced-air cooling system.

Overview

Professional Medical Storage Solution

This upright medical freezer is engineered for the secure storage of temperature-sensitive biological samples and pharmaceutical products. It features a robust design with a two-layer glass door for visibility and integrated locking mechanisms for enhanced security. Equipped with reliable cooling technology and internal LED lighting, it provides a stable environment ideal for laboratories, pharmacies, and clinical settings.

Technical Specifications

Temperature Range	2-8 °C
Noise Level	45 dB
Refrigerant	R600a, R134a
Operating Humidity	35-75% RH
Daily Energy Consumption	0.95 kWh/24h

Electrical

Power Requirements

- 110V/60Hz
- 200-240V/50Hz

Dimensions & Logistics

Weight

85 kg

Net Weight

90 kg

Gross Weight

Product Dimensions	595 x 611 x 1785 mm
Package Dimensions	662 x 684 x 1850 mm

Compliance & Features

Certifications

CCC • CE • RoHS • ETL • CB • SAA

Key Features

- Mechanical thermostat
- LED inner light
- White plastic-coated shelves
- Two-layer glass door with locker
