Product Overview

Professional Medical Storage Solutions

This medical storage refrigerator is engineered to provide precise temperature control and secure storage for sensitive medical supplies, including vaccines and medications. Featuring a robust compressor-based cooling system with forced-air circulation, it ensures uniform temperature distribution and frost-free operation. Designed for reliability in pharmacies and laboratories, the unit includes essential safety features such as a lockable double-layer glass door and an integrated digital temperature controller.

Performance & Cooling

Temperature Range

2 °C

Minimum Temp

8 °C

Maximum Temp

Refrigerant Options

R134a • R600a

Cooling Technology

Compressor, No Frost, Anti-Vibration, Circulated Air

Design & Construction

Door Construction

2-layer glass door with security lock

Interior Lighting

White LED

Shelf Type

White plastic coated shelves

Electrical Specifications

Supported Power Supply

- 110V/60Hz
- 200-240V/50Hz

Control & Monitoring

Temperature Control	Digital temperature controller with Hi/Lo alerts
Internal Temp Difference	2 °C
