

Medium-Duty Construction Dump Truck

This medium-duty dump truck is designed for construction and material handling. It features a robust chassis, a high-capacity dump bed with reinforced sidewalls, and a hydraulic lifting system for efficient unloading.

Overview

Medium-Duty Construction Dump Truck

This medium-duty dump truck is engineered specifically for demanding construction and material handling applications. It features a robust chassis paired with a high-capacity dump bed, utilizing a reliable hydraulic lifting system for efficient unloading. Designed with operator comfort and safety in mind, the cabin offers enhanced visibility and ergonomic controls, while the vehicle's heavy-duty axles and fuel-efficient engine ensure dependable performance in tough working conditions.
