

Medium Voltage Heat Shrinkable Cable Joint Kit

These medium voltage heat shrinkable cable accessories are suitable for cables up to 12/20(24) kV, insulated with PVC, XLPE, and PE polymeric materials. The kits accommodate a wide range of cable sizes and constructions.

Product Overview

Medium Voltage Cable Jointing Solutions

These medium voltage heat shrinkable straight joint accessories are engineered for reliable cable connections in power distribution networks. Designed to accommodate PVC, XLPE, and PE polymeric cables, they provide robust insulation and environmental protection. With excellent UV and weather resistance, these kits ensure long-term durability and safety for medium voltage applications.

Technical Specifications

Compliance Standard

IEC 60502-4

Voltage Rating

12/20(24) kV

Key Features

Performance Benefits

- Reliable stress control
- Large cross-section range compatibility
- Superior electrical and mechanical properties
- Easy installation

Material Characteristics

UV Resistant, Weather Resistant, Corrosion Resistant, Anti-tracking
