

Memory Card Reader

This is a memory card reader. It is used to transfer data from memory cards to computers.

Product Overview

Professional Air Handling Unit

This centralized air handling unit is designed for robust performance in commercial HVAC applications. It serves as a critical component for conditioning and circulating air, ensuring optimal indoor environmental control. Engineered for large-scale buildings, the unit integrates essential features including blower systems, heating and cooling elements, and advanced filtration chambers to maintain air quality and thermal comfort.

Technical Specifications

System Components

- Blower system
- Heating elements
- Cooling elements
- Filter chambers
- Sound attenuators
- Dampers

Equipment Type

Air Handling Unit (AHU)

Application

Commercial HVAC, Centralized Air Conditioning, Large Building Infrastructure
